

	BECAUSE OF THE LOVE FROM MY ANCESTORS AND COMMUNITY...	WITH LOVE FOR MY ANCESTORS AND COMMUNITY...
ATTITUDE	I am: open-minded, passionate, resilient, intentional, conscientious, and caring.	I wish to: take more risks, be more confident in the unknown, act with more tranquility, and act on my inner desires without shame.
SKILLS	I am a: cultural storyteller, critical thinker, facilitator, costume designer, drag performer, potter, chef, and peacemaker.	I wish to become a/an: electronics maker, detailed researcher, ecosystem-focused farmer, resource creator, community activator, carpenter, and 3D modeler.
KNOWLEDGE	I know that we must: decolonize [land back], separate our design practice from white supremacy, share our knowledge freely, build accessibility into everything we do, and create a deeper understanding of actionable love.	I know I must learn: what past students have done before me, how artificial intelligence can positively impact community, how ecosystems sustain the planet, the importance of chemistry, and how incentives impact decision making.
